The Arts

All students take a block course on a rotation basis from:

Dance

Drama

Music

In Year 7, extension work and learning support is offered to selected students in English and Mathematics. Students may also elect to participate in one of the four Junior Sports Academies the School has available:

- Cricket
- Football
- Netball or
- Rugby.

Christian values are an intrinsic part of the special character of St Peter's School. The Year 7 course provides students with a foundational understanding of the Christian faith.

All Year 7 students participate in an Outdoor Education experience. During the first term, all our Year 7's travel away together to Waimarino in National Park which is situated on school land, where it does not take long for new friendships to be established. The focus of this camp is bush craft.

In addition to internal assessment, students may participate in CEM assessments in English, Science and Mathematics. Selected students may also compete in the Otago University Mathematics Problem Challenge. The School also enters teams for the regional Waimaths competition.

The students participate in and represent the School in a wide range of sports, cultural, musical and service programmes. These include orchestra, choir and the prep production run bi-annually to name but a few.
